PROFESSIONAL SUMMARY:

Results-driven AI-Integrated Full-Stack Developer specializing in Next.js, TypeScript, and AWS cloud architecture. Proven track record of architecting scalable SaaS applications, orchestrating LLM integrations for automated workflows, and leading cross-functional teams to deliver high-performance digital solutions. Adept at optimizing data retrieval and modernizing legacy systems to drive operational efficiency.

EDUCATION:

B.Tech in Computer Science & Engineering (2021 - 2025)
Bengal College of Engineering & Technology, MAKAUT - CGPA: 8.15

TECHNICAL SKILLS:

Languages: JavaScript (JSX), TypeScript, Java, Python, C++
Frontend: React.js, Redux, Next.js, Tailwind, Bootstrap
Backend: Node.js, Express.js, REST API, Socket.IO
Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch), SST, Docker, CI/CD, Domain Configuration
Database: MongoDB, MySQL
Tools & Concepts: Git/GitHub, Firebase, Figma, SEO, JWT Auth, Web Scraping, Jest, Ollama, Prompt Engineering

WORK EXPERIENCE:

- Banao Technologies | Full Stack Developer | Remote (Nov 2025 - Present)**
- Led a 6-member cross-functional team (3 FE, 2 BE, 1 QA) to architect scalable SaaS products, including Vikaas AI and ATG Meet Recorder (supporting 7.8k+ active users and processing 150 videos/day).
 - Slashed company website load time from 5-8s down to 1s by optimizing database schemas and server-side state management.
 - Enforced CI/CD pipelines and authored custom Jest test suites, reducing production bugs by 15%.
- HireCream | Full Stack Developer | Remote (Sept 2024 - Nov 2024)**
- Engineered SEO-optimized landing pages for the AI4Chat platform, significantly improving accessibility.
 - Boosted page load efficiency by 30% utilizing Handlebars.js and Express.js server-side rendering (SSR).
 - Architected MongoDB retrieval mechanisms to ensure real-time data consistency across AI tool interfaces.
-

PROJECTS:

- AetherDocs | Multi-Tenant Collaborative SaaS ([Live](#)) | Tech: Next.js, TypeScript, MongoDB**
- Engineered a real-time collaborative workspace using Socket.IO to handle concurrent document edits without data conflicts.
 - Integrated secure tenant authentication, tier-based subscription monetization, and super-admin dashboards.
- LabTesto | Full Stack Medical Booking Platform ([Live](#)) | Tech: Next.js, TypeScript, Tailwind, MongoDB**
- Built a mobile-first Next.js booking app, eliminating physical logs and reducing admin workload by 80%.
 - Deployed a serverless AWS Lambda architecture with automated Telegram API notifications, accelerating lab booking speed 3x.
- CRM Console | AI-Powered Business Management SaaS ([Live](#)) | Tech: Next.js, TypeScript, Node.js, Web Scraping**
- Built a custom CRM integrating local LLMs (Ollama) and web scraping for secure data extraction, accelerating lead generation by 200%.
 - Automated intelligent email templates and receipt generation, saving the client 15+ hours weekly in manual administration.
-

CERTIFICATES [\[View Certificates\]](#)

- Java Full Stack - Wipro TalentNext (Oct 2024)
- Frontend Developer (React), SQL (Advance), JavaScript - HackerRank
- Google Data Analytics (Coursera, 2023)
